I think that you should send it by email with copies to all consulting parties, and resort to a formal letter only if the City fails to make substantial good-faith effort to incorporate limited mitigation that is reasonably responsive to consulting party concerns, as we have suggested.

Thanks, any feeling from anyone if this has to be a formal letter or can I just send it in lieu of saying this at a meeting?

Ted:

One comment: The park restoration could be mitigation of project impacts on another park – it doesn't have to be the same park, though the two parks should be in the same general area.

Joe, Jim,

Attached is a summary statement of the FTA position on the outstanding mitigation issues. Basically I summarized Joe's comments a little and added a little general context. As noted, the consulting parties and ACHP have been after FTA to make a statement. As a meeting wasn't possible until next week, I agreed with the City that it would be best to get the FTA position out there for consumption so it can be discussed at the meeting and/or get them thinking of alternatives before hand. This may make the next meeting a little more productive.

Ok with you guys? Should it be transmitted officially from Leslie or do we need to go that far? Please provide me with any comments. Thanks,

Ted
